CAREER OBJECTIVE

Final-semester Computer Science & Engineering student (AIUB, Major in Information Systems, graduating December 2026) seeking a junior software engineering, AI engineering, or data science role. Built full-stack apps with live users; apply the same rigor to data analysis, machine learning, and RAG in Python. Co-author of an IoT paper accepted at ICCA 2026.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, PHP, Java, C++, C#, HTML, CSS

Frameworks: React, Next.js, Node.js, Express, Electron, Tailwind CSS

Data Science & AI: Pandas, NumPy, Scikit-learn, Seaborn, LangChain, exploratory data analysis, data cleaning

Data & Cloud: Supabase, PostgreSQL, MySQL, SQLite, Cloudflare Workers, Vercel, Docker (basic)

Tools: Git, GitHub Actions, Playwright, Linux, debugging and testing

PROJECTS

MessManager – *Shared-Housing Management Web App*

Technologies: JavaScript, Supabase, PostgreSQL, Web Push

- Built and run a production platform with 4 active users: meals, bills, rent, member settlements, and carry-forward credits
- Added web push via service workers and a Supabase Edge Function; fixed settlement bugs by tracing carry chains

Open Data Universe – *Dataset Discovery Web App*

Technologies: React, Cloudflare Workers, JavaScript

- Built and deployed a search app whose Cloudflare Worker backend aggregates 20+ open-data sources into one interface

AIUB Notice Monitor Bot – *Automation*

Technologies: Python, GitHub Actions, Telegram API

- Checks the AIUB notice board hourly on GitHub Actions and sends Telegram alerts for new notices; used by 5 students

AIUB Course Selector Pro – *Desktop Automation App*

Technologies: Electron, Playwright

- Automates course-section loading and schedule conflict detection, generating multiple conflict-free registration plans

TourneyHub – *Tournament Management Web App (university team of 4)*

Technologies: PHP, MySQL (TiDB Cloud), JavaScript, Docker

- Redesigned and deployed a role-based platform (Admin, Organizer, Player) with team registration, match scheduling, and automatically computed league standings on a cloud MySQL database over TLS
- Hardened the codebase with prepared statements, bcrypt password hashing, CSRF protection, and validated uploads; containerized with Docker for Render deployment

Customer Segmentation – *RFM Analysis*

Technologies: Python, Pandas, Scikit-learn

- Engineered Recency, Frequency, and Monetary features from 541,909 UK retail transactions and segmented 4,372 customers into 3 K-Means clusters, choosing k via elbow-method SSE analysis

NYC Taxi Revenue Analysis – *Data Cleaning & Business Reporting*

Technologies: Python, Pandas

- Cleaned 6,433 trip records to 6,347 rows and built borough-level revenue and payment-method pivot reports

EDUCATION

American International University-Bangladesh (AIUB) – Dhaka

Jun 2023 – Dec 2026 (Expected)

- B.Sc. in Computer Science & Engineering, Major in Information Systems
- **Relevant Coursework:** Database Systems, Machine Learning, Operating Systems, Computer Networks

Shah Neamatullah College, Higher Secondary Certificate (HSC), Science – Rajshahi

2020 – 2021

Harimohan Govt. High School, Secondary School Certificate (SSC), Science – Rajshahi

2018 – 2019

CERTIFICATIONS

- Data Science & Machine Learning with Python Ostad, 2026
- Intermediate Python DataCamp, 2026
- Learning Docker LinkedIn Learning, 2026
- Ubuntu Linux Professional Canonical, 2026

ACHIEVEMENTS

- Co-author, IoT-Based Smart MedBox – paper accepted at ICCA 2026 (Paper #498)
